Employments

Sustainable Consumption and Production: Policy Support - Indonesia	
Location	Jakarta
Host	Ministry of Environment
Period	January – October 2012
Client	The SWITCH Asia Programme (www.switch-asia.eu) via the EU Delegation to Indonesia
Position	Team Leader (8 manmonths, resident)
Description	The objective is to promote an integrated and coordinated approach in developing and implementing the national policies on Sustainable Consumption and Production (SCP) by strengthening coordinated nation-wide SCP implementation and facilitating the development of the SCP National Action Plan, implementing SCP policies and identifying and evaluating options of financial mechanisms to promote SCP.

ASEAN Centre for Energy, then ASEAN-EC Energy Management Training and Research Centre	
Location	Indonesia, Jakarta
Period	February 1996 – January 1999
Employer	European Commission, Directorate General for External Relations
Position	EC Senior Adviser (30 manmonths, resident)
Description	The ASEAN-EC Energy Management Training and Research Centre (AEEMTRC) was primarily financed by the European Commission and had 12-15 academic staff members. It was managed by an ASEAN Director, supported by the EC Senior Adviser. This included oversight and delegation of the AEEMTRC budget in compliance with the European Commission project management procedures and financial regulations. A major task was to transform AEEMTRC (relying on grant funding) into the ASEAN Centre for Energy (ACE) by January 1999, as an autonomous, financially self-sustainable entity. AEEMTRC was supporting the energy co-operation between the EU and the ASEAN and among the ASEAN Member Countries by collecting, collating and disseminating energy information (e.g. by publishing the ASEAN Energy Bulletin); by conducting seminar-workshops and training courses; and by facilitating regional projects, in particular the regional gas transmission system, the regional power grid, and the ASEAN Energy Outlook (ASEAN 2020). AEEMTRC seconded European experts to events and project activities. AEEMTRC assisted the ASEAN Secretariat in preparing the ASEAN Senior Officials Meeting on Energy (SOME) and facilitating the activities of ASEAN collegial bodies, such as the Sub-Sector Networks for Renewable Energy (RE-SSN) and for Energy Efficiency and Conservation (EE&C-SSN) and the ASEAN Forum on Coal (AFOC). AEEMTRC's activities were much alike the activities of today's ASEAN Centre for Energy, cf. www.aseanenergy.org AEEMTRC was funded almost entirely by EC DG 1 (external relations) and DG 17 (energy). These two DG's also funded projects, which were identified and developed by AEEMTRC.

Projects

Finalisation of the SWITCH Policy Support Component programme in the Philippines	
Location	Manilla, Philippines
Period	April – May 2011
Client	AGEG Consultants eG, commissioned by the EU Delegation, Manilla
Position	Renewable Energy Specialist (0.6 manmonth) in a multi-disciplinary team of two international experts
Description	The objective of the Finalisation Mission was to draft a project to support the development and implementation of SCP (Sustainable Consumption and Production) policies in the Philippines, in line with existing government priorities. Support to the implementation of the main renewable energy policies and laws was one of two components.

Energy efficiency in Indonesia	
Location	Indonesia
Host	Ministry of Energy and Mineral Resources
Period	February 2007 – April 2007
Client	Danish Ministry of Foreign Affairs (Danida)
Position	Energy specialist (2 manmonths)
Description	Manager and key author, assisted by local consultants, of component ‘Energy conservation in industries and large buildings’ (in English) of the design document for a bilateral cooperation programme (2008-2012). The technical assistance project, carried out by a multi-disciplinary team, involved communication with high level officials and other key stakeholders, and coordination with other donor agencies supporting similar activities.

Formulation of legal framework on renewable energy for Cambodia, Laos and Vietnam	
Location	Cambodia, Laos and Vietnam
Period	June 2006 – December 2006
Client	Grontmij (Sweden); commissioned by the ASEAN Centre for Energy (ACE), The EU-ASEAN Energy facility
Position	Senior Energy Policy Expert (2.5 manmonths). Three EU experts; one was overall manager incl. logistics and finance, another was a renewable energy technical expert.
Description	In this European Commission funded technical assistance project Boldt (as lead author) formulated, in cooperation with high level officials and other stakeholders from the three countries, draft renewable energy laws for Cambodia and Vietnam and a draft road map for developing a renewable energy policy in Laos (all in English). Several meetings were held with senior officials, and a national workshop was conducted in each country (100 participants in total). Besides giving presentations, Boldt managed a participatory process to maximize local ownership. To support the regional integration between the countries, the project was concluded by a regional seminar (30 participants) for country representatives and the ASEAN Sub-Sector Network for Renewable Energy. The project also built on experiences from the ASEAN and European Union as well as the existing legal and policy framework in the beneficiary countries.

Integrated Ressource Planning	
Location	Malaysia
Host	Ministry of Energy, Communications and Multimedia
Period	January 2001 – November 2001
Client	Danida, as employee of Ramboll Denmark
Position	Energy supply expert (2 manmonths)
Description	The objective of this technical assistance was - through partnerships with high level officials - to define and detail the means (e.g. on-the-job and workshop trainings) for improving the institutional capacity on integrated resource planning (finding the optimal balance between investments in energy supply and in energy efficiency) in government and related agencies, like the Malaysian Energy Centre (PTM).

Renewable Energy and Energy Efficiency in Thailand	
Location	Thailand
Host	National Energy Policy Office
Period	September 1999
Client	Danida, as employee of Ramboll Denmark
Position	Renewable energy expert. Team of two European experts, the other on project management and energy efficiency, plus local experts.
Description	Manager and lead author of components ‘Increased harnessing of renewable energy resources’ and ‘Improved policy development capacity’ of the design document for a 5-year bilateral cooperation programme (in English), including a strategy and an action plan for concrete projects to be implemented. The technical assistance project involved communication with high level officials and other key stakeholders, and coordination with other donor agencies supporting similar activities.

Renewable Energy and Energy Efficiency in Malaysia	
Location	Malaysia
Host	Ministry of Energy, Communications and Multimedia
Period	March 1999 –May 1999
Client	Danida, as employee of Ramboll Denmark
Position	Team Leader and Renewable energy expert. Team of two European experts, the other on energy efficiency, plus local experts.
Description	Team Leader and lead author of component ‘Renewable energy’ (in English) of the design document for a 5-year bilateral cooperation programme, including a strategy and an action plan for concrete projects to be implemented. The technical assistance project involved communication with high level officials and other key stakeholders, and coordination with other donor agencies’ previous and on-going activities.

EC-ASEAN COGEN Programme	
Location	ASEAN Countries and Copenhagen
Host	Asian Institute of Technology, Bangkok
Period	September 1992 – March 1995
Client	European Commission, Directorate General I (external affairs)
Position	Team Leader of European Focal point, hosted by the Danish Energy Agency
Description	This European Commission funded cooperation programme, supported the regional integration within ASEAN in finding common solutions to the utilization and adoption of European technologies. The Programme was an economic cooperation programme between the European Commission and the ASEAN Secretariat, concerning transfer of technology in the field of heat and power generation from biomass and residues, and applying a multi-disciplinary approach. Boldt managed the production of major communication deliverables in compliance with European Commission project management procedures and financial regulations, e.g. the 'European Directory of Biomass Energy Companies' and a 22-pages intro-brochure on the programme for a wide audience, both in English.
